Art Unit: 3632

This is the first office action for serial number 10/042,871, Cantilevered Structural Support, filed on January 8, 2002.

Priority

Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(e).

Drawings

The formal drawings filed February 27, 2002 have been approved.

Information Disclosure Statement

The information disclosure statement filed April 16, 2002 and June 27, 2002 have been placed in the application file, and the information referred to therein has been considered.

Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, "cantilevered portions" should read --cantilevered portion-- and "the support members" should read --the support member--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7-9, 12 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,354,166 to De Crane, hereinafter De Crane. The present invention reads on De

Crane as follows: De Crane disclose a cantilevered structural support comprising a

counterbalance (58, 60) and elongate support member (82). The elongated support member has a

secured portion that is attached to the counterbalance and a cantilevered portion extending

outward from the counterbalance to support a freestanding structure having a footprint area (92),

wherein when the cantilevered structural support is used to support the structure. The

cantilevered portion of the support member is configured to support 40 percent or more of the

footprint area of the structure. The counterbalance is formed of concrete. The elongate support

member is a beam. The beam is an beam formed of steel. The method claims are predicated on

the claimed structure and stands rejected as such.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/042,871 Page 4

Art Unit: 3632

 $_{\mathcal{A}}$ 1

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Crane. De Crane teaches the limitations of the base claim, excluding the beam being formed of concrete or wood. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the beam from wood or concrete, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

Claims 2-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 13-17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach the plate and anchoring bolts extending into the counterbalance..
